

A. Public Records

1. Unless otherwise provided by law, any written or electronic records of a public governmental body are to be open and available to the public for inspection and copying, in accordance with RsMO 610.023. For districts, some examples would include cost-share waiting lists, contractor lists and e-mails. However, this does not include social security numbers or tax identification numbers. If a member of a public body sends an e-mail related to public business to at least two other members of the public body, so that counting the sender a majority of the members of the body are copied, a copy of the e-mail needs to be sent to the custodian of records for the public body, as it is considered a public record.
2. A reasonable fee may be charged for providing access to or providing copies of public records. The board may charge a fee up to the maximum amount established in the current Sunshine Law.
3. The Sunshine Law requires that a request for access to a public record be responded to by the end of the third business day, following the date the request is received by the custodian of the public record. In the response, the district should provide a time-frame in which the records will be produced. If a request for access is denied, the custodian shall provide upon request, a written statement of grounds for the denial.
