Subject: Memo 2019-014 Request for Comments on Draft Policies on Denitrifying Bioreactor and Saturated Buffer

Attached are the slides used during last summer's area meeting discussion on the bioreactor and buffer to assist with the review of the draft policies. The slides provide a general overview of the practices, potential components needed for installation and a few pictures of the practices being installed.

Thank you!

1. The first part of the document discusses the importance of maintaining accurate records of all transactions. This is essential for ensuring the integrity of the financial statements and for providing a clear audit trail. The records should be kept up-to-date and should be easily accessible to all relevant parties.

2. The second part of the document outlines the various methods used to collect and analyze data. This includes the use of surveys, interviews, and focus groups. Each method has its own strengths and weaknesses, and it is important to choose the most appropriate method for the research objectives. The data collected should be analyzed carefully to identify any trends or patterns.

3. The third part of the document discusses the results of the research. This includes a detailed description of the findings and a discussion of their implications. The results should be presented in a clear and concise manner, and should be supported by appropriate evidence. The implications of the findings should be discussed in terms of their potential impact on practice and policy.

4. The fourth part of the document discusses the conclusions of the research. This includes a summary of the main findings and a discussion of the limitations of the study. The conclusions should be based on the evidence presented in the document, and should be supported by appropriate reasoning. The limitations of the study should be discussed in terms of their potential impact on the validity of the findings.

5. The fifth part of the document discusses the implications of the research for practice and policy. This includes a discussion of the ways in which the findings can be used to inform decision-making and to improve practice. The implications should be discussed in terms of their potential impact on the field of study.
