Subject: FW: Actual Cost Database - known issue with entering decimal extents

All: We have been asked by Lauren Cartwright to forward this email to all SWCD staff.

Thanks you to those that have brought to our attention that the new Actual Cost Database has a limitation in the extents entry boxes that does not allow decimal entries.

We are correcting the issue; however FSA is in the process of transitioning SharePoint sites. As soon as the database gets transitioned to the new SharePoint host site we will correct the decimal entry issue and also notify everyone of the updated location for the database.

Please do continue entering data that does not require decimal extents at this time. All data entered into the existing database will be transferred to the new site.

If you have any questions or concerns please don't hesitate to let me know.

Lauren
