Good afternoon,

In an effort to streamline mapping work and the report generation process, the Soil and Water Conservation Program has worked to provide an additional resource on the process of filtering within the mapping program.

Filtering allows for the temporary removal of previously mapped features within the mapping program. This ability to not display incorrect items or remove features which are unable to be edited is especially useful during the creation of a report for payment, as this can produce clearer maps and reports that help to expedite the payment process.

A video demonstration of filtering is now available on the Soil and Water Districts Intranet page or in the District Training Material in SharePoint at:

[DNR-NRG-SWCD-ALL - District Training Material - All Documents](#)

If district staff have any questions on filtering or the State Mapping Tool, please contact your District Coordinator.

Thank you,

MoDNR Soil and Water Conservation Program
