Subject: Updating the WIN-PST Status Bar with New Website Location

Good afternoon,

The WIN-PST Status bar is no longer functioning and needs to be updated to a new website. The Status bar, located in the lower right corner, lets the user know if a pesticide update is available for the program (see clip below). The Status bar will turn yellow if an update is available, otherwise it will show the WIN-PST is ready.

The website the program references to determine the status has been changed and users are needing to go into WIN-PST and set up the new website location. The PDF file titled "Fix Automatic Pesticide Data Update Notifications in WIN-PST" provides step-by-step instructions and the new website address for the pesticide update notification. The information can be found directly above the Download: WIN-PST Pesticide Update section of the [NRCS Win-PST page](#).

[Fix Automatic Pesticide Data Update Notifications In WIN-PST](#) (131.62 KB)

Download: WIN-PST 3.1 Pesticide Update 3-27-26

If you have any questions regarding the update, please let me know.

Patricia Turman
