Subject: FW: See it done right — Day 2 Field Demos at the MO LICA Stream Bank Conservation Showcase, July 23
Date: Friday, July 10, 2026 7:52:18 AM
Attachments: [image002.png](#)

Good morning,

See the email below from Andrea Rice about the second day of MO LICA's streambank field day focused on contractors. Please share with any contractors that may be interested in seeing the installation of a streambank stabilization practice.

Thanks.

Subject: See it done right — Day 2 Field Demos at the MO LICA Stream Bank Conservation Showcase, July 23

Jim,

Here is an email you can share with your District staff to share with contractors.

Eroding stream banks pull topsoil, nutrients, and fertilizer investment off the field and send them downstream. Missouri LICA is bringing contractors and landowners together to show exactly how to stop it — in the field, on a live site.

Join us for **Day 2 — Contractors in Conservation** of the Stream Bank Conservation Showcase on **Thursday, July 23, 2026, in Linn, Missouri**. Day 2 is built for working contractors and the landowners they serve — a hands-on day of live rock placement, equipment demonstrations, and proven field techniques you can put to work on your next project.

What you'll see and do:

- Live rock placement on an active stream bank stabilization site

Equipment demonstrations and real-world field techniques

- How the cost-share program makes stabilization affordable for landowners
- Time to connect with fellow contractors, landowners, and agency partners

Whether you run the equipment or own the ground, you'll leave knowing how the practice is built, what it costs, and how to get it done right — protecting your soil, your investment, and water quality downstream.

Learn more about the event and see the full agenda here: [Stream Bank Stabilization Showcase](#).

Ready to join us? [Register for the event](#).

Space at the demo site is limited, so I encourage you to register early. I hope to see you on the bank with us.
