Subject: State Mapping Program

Good morning.

In the near future the Program Office will be making available the parcel ownership layer for each district. This information is for district use only and must not be distributed for any reason, the information in this layer should be treated with the same landowner confidentiality rules that apply to district cost share and other landowner information. All districts may not be available initially on the same day but should follow soon.

Another recent addition is a line feature for the DSL-05 diversion practice and a point for feature any practice that requires outlets for the practice in the Edit window.

Program staff, ITSD and NRCS are also actively working to find an efficient solution to moving data between NRCS Conservation Desktop and the State Mapping Program. As information becomes available we will notify the districts.

Thank you!
