Subject: State Mapping Tool Login

Good Afternoon,

The program office is working with ITSD to finish the process of adding the Parcel Layer to the program's mapping tool. At this time when a district user logs in you will see a new login window for the Parcel layer. Currently this login is not functioning, to move past this window the user will need to close or cancel and the rest of the mapping program will function normally.

Once again we are working with ITSD and should have the set up finished in the near future. When completed we will notify the district offices, as well as send instructions.

Thank you.
