

COVER CROP WORKSHOP

- Date – June 30th, 2026
- Time – 9am to 12p (lunch provided)
- Location – Preferred Community Center
14375 HWY 71 Savannah, MO (old Vanderbilts)
- RSVP by June 15th

WHY COVER CROPS

Cover crops help protect Missouri's soil from erosion, especially during heavy rains, while improving water infiltration and soil health. They add organic matter, reduce runoff, and can naturally suppress weeds. Over time, they improve crop resilience and long-term farm productivity.
