

Nutrient & Pest Management

Sign up periods are in November of each year. All applications must be board approved between January 1 – April 15th of each year. Payments are completed after one growing season but not before October 31st of that year.

Either the landowner or the operator may apply for this practice. The operator must incur the farm operating expenditures and have an “Operator Authorization” form signed by the landowner on file with the District.

N590, Nutrient Management - Incentive payment not to exceed \$20 per acre per year for a life time maximum of \$10,000. Provides operators an incentive to adopt new management techniques and/or technologies for applying manure and fertilizer. *The land must be eroding at or below the tolerable soil loss level.*

N595, Pest management– Incentive payment of \$10.00 per acre per year for a life time maximum of \$5,000. The purpose is to minimize entry of chemical contaminants to ground and surface water by following a pest management plan.
