NATURAL RESOURCES
Michael L. Parson, Governor Carol S. Comer, Director

MEMORANDUM
2020-001

DATE: July 10, 2019
TO: All Soil and Water Conservation Districts
FROM: *CM* Colleen Meredith, Director
Soil and Water Conservation Program
SUBJECT: State Average Cost List

The June 2019 Standardized State Average Cost List has been finalized and is attached for your reference. The list is also posted on the Natural Resources Conservation Service Field Office Technical Guide at <https://efotg.sc.egov.usda.gov/>.

As a reminder, the Soil and Water Districts Commission requires a cap on the county average cost for earthmoving components that is no more than ten percent above the state average cost. For example, if the state average cost for an earthmoving component is \$1.00, the maximum amount that can be entered for that component is \$1.10. For earthmoving components, the *maximums* have been entered into MoSWIMS as part of the rollover process. For FY20, the maximums for earthmoving components will be the same as FY19 with the exception of Top Soil for Terrace component which decreased. The ten percent above the state average cost gives districts some flexibility to offer a higher rate for earthmoving in areas where contractor rates are more than the state average. Districts are encouraged to enter a county average cost for these components that accurately reflects local costs or use the actual state average cost for earthmoving components.

New flap gate components and definitions have been added in MoSWIMS (sequence numbers 9172-9178) to more accurately reflect state cost-share usage.

If you have any questions on the information contained in this memorandum, please contact your district coordinator. Thank you.
