Management Intensive Grazing

The regional Grazing Schools are educational programs taught by the Natural Resources Conservation Service (NRCS) and University of Missouri Extension (UE). The programs are intended to educate producers and agency personnel in the art and science of grazing management, transfer new technology in grassland management to producers and agency personnel and to qualify producers for the State DSP-3 cost-share program. There are 9 grazing school regions across the state. For further information about registering for a SE Regional grazing school please contact Anthony Ohmes: ohmesg@umsystem.edu. For information about other regional schools, visit <http://mofgc.org/>.

USDA is an equal opportunity provider, employer, and lender.
