### Cost Share Programs Available to Assist with Rotational Grazing

**DSP-3, Planned Grazing Systems**, practice is available in participating counties through district cost-share. The main objective is to promote total resource management on pastureland through rotational grazing. Cost-share is available for interior fence, water and water distribution.

**EQIP, Environmental Quality Incentives Program**, is available through NRCS. The main objective of the program is to better manage present resources. Cost-share will be provided for components necessary to install a grazing system as well as addressing additional on the farm concerns.

**MDC, Missouri Department of Conservation**, provides cost share for alternative water and fence to exclude livestock from riparian areas.

**CCRP, Continuous Conservation Reserve Program**, has cost share available for alternative water and fencing for riparian areas for livestock exclusion with enrollment of qualifying ground into CRP as marginal pasture.

The Soil & Water Conservation Districts are funded by the  
1/10 of 1% Parks, Soils and Water Sales Tax.

USDA is an equal opportunity provider, employer, and lender.

Special Thanks to Russell Vahle  
and Jerry Weinrich for hosting our  
farm tours.
