

Turkey Habitat Workshop

Saturday, May 17th, 2025
10:00am-2:00pm

You are cordially invited to attend a free wild turkey workshop in **Wayne County, Missouri (near Hiram)**. Participants will delve into various aspects of turkey habitat management, including the biology of turkeys, characteristics of optimal nesting and brood-rearing habitats, and available state and federal incentive programs that can assist in habitat development. The event will also feature a field tour of a private farm, showcasing habitat improvement practices such as woodland thinning, prescribed burning, pollinator habitat, and more.

We're confident that this experience will equip you with a better understanding of turkey habitat requirements and help you maximize the wildlife potential of your own land!

Wildlife and Private Lands Professionals will be on hand to lead the event and lunch will be provided free of charge.

Space is limited so pre-registration is required by May 9.
